

Flora Trio Nutrient Schedule

General Hydroponics Flora Series + CaliMagic

Last updated June 2023

by GrowWeedEasy.com

- 1.) Add nutrients to water (Micro first)
- 2.) Adjust pH of nutrient water by using pH Up or pH Down
 - Hydro/Coco: 5.5 - 6.5 pH | Soil : 6.0 - 7.0 pH
- 3.) Give water to plants and remove any runoff
- 4.) Adjust nutrient strength as needed...
 - More nutrients for pale plants with yellow lower leaves
 - Less nutrients for dark-green plants with nutrient burn

Photoperiod Notes:

- Repeat Week 4 until plant is half final desired height
- Initiate flowering stage with a 12/12 light schedule
- Repeat Week 9 for a longer flowering stage

Autoflowering Notes:

- Repeat Week 4 until you see buds, then start Week 5 (Transition)

Amounts per 3.79 liters (1 US Gallon)

		Base Nutrients			Optional	
		FloraMicro	FloraGro	FloraBloom	CaliMagic	
Vegetative Stage	Seedling	Week 1	1/4 tsp	1/4 tsp	1/4 tsp	1 tsp
	Vegetative	Week 2	1/2 tsp	1/2 tsp	1/2 tsp	1 tsp
	Vegetative	Week 3	1/2 tsp	1/2 tsp	1/2 tsp	1 tsp
	Vegetative	Week 4	1/2 tsp	1/2 tsp	1/2 tsp	1 tsp
Flowering Stage	Transition	Week 5	1 tsp	1 tsp	1 tsp	1 tsp
	Transition	Week 6	1 tsp	1 tsp	1 tsp	1 tsp
	Early Bloom	Week 7	1 tsp	1/2 tsp	1 1/2 tsp	1 tsp
	Mid Bloom	Week 8	1 tsp	1/2 tsp	1 1/2 tsp	1 tsp
	Mid Bloom	Week 9	1 tsp	1/2 tsp	1 1/2 tsp	1 tsp
	Late Bloom	Week 10	1/2 tsp	1/4 tsp	1 1/2 tsp	1 tsp
	Late Bloom	Week 11	1/2 tsp	~	1 1/2 tsp	~
	Ripen	Week 12	1/4 tsp	~	1 1/2 tsp	~
	Flush	Week 13	~	~	~	~

Easy Mode: Follow schedule on the bottle label at 1/2 strength. Increase if plants need it. No charts or memorization required!
